PIGMENT DISPERSION FOR PAPER & PULP COATING

Vipul Organics Limited is one of the fastest growing color companies in India. Established in 1972, we have four ISO 9001: 2015 certified plants. Our head office is in Mumbai. We have presence in over 45 countries. We are listed on the Bombay Stock Exchange (BSE). Our basket of products includes Pigment powder, Pigment Dispersion, Dyestuffs and Pigment intermediates. Our USP is that we produce our own pigment intermediates from which we produce pigment powder from which we produce pigment dispersion. This backward <-> forward integration helps us provide the right quality of products at the right pricing for our customers.

SunPulp is the exclusive brand of highly engineered and manufactured organic water-based Pigment dispersions formulated specially for the paper industry.

SunPulp is available in a wide range of formulations wherein we specialise in providing tailor made solution for our customers. **SunPulp** pigment dispersions give more durable, permanent color and offers strong resistance to fading and bleeding, making them ideal for use in tinting and coating of paper.

SunPulp range of dispersions provides the following performance benefits :-

- Provides more durable, permanent color
- Offers strong resistance to fading and bleeding
- Pureness of shade
- Superior performance than dyes for light and bleed fastness from an operational perspective for the mill.
- Low viscosity for use in automated dosing stations
- Non foaming
- Optimal particle size distribution allowing for superior fixation
- Elimination of speckles / comets on paper leading to an improved product
- Flexible Packing options for handling and storage
- Custom blends / tailor made mixes can be produced to eliminate mixing at the mill and to reduce range of colors needed
- Excellent dispersibility due to fine milling and high quality of dispersion
- Extremely low levels of residue left on equipment, improved ease for wash down
